

MVV Energie – Energising the Future

Fact book

First nine months of 2009/10 financial year

13 August 2010

www.mvv-investor.de

MVV Energie in brief

Business activities of the MVV Energie Group

Electricity

District heating

Environmental energy

Gas

Value-added services

Water

Energy industry value chain

Generation (non-regulated)

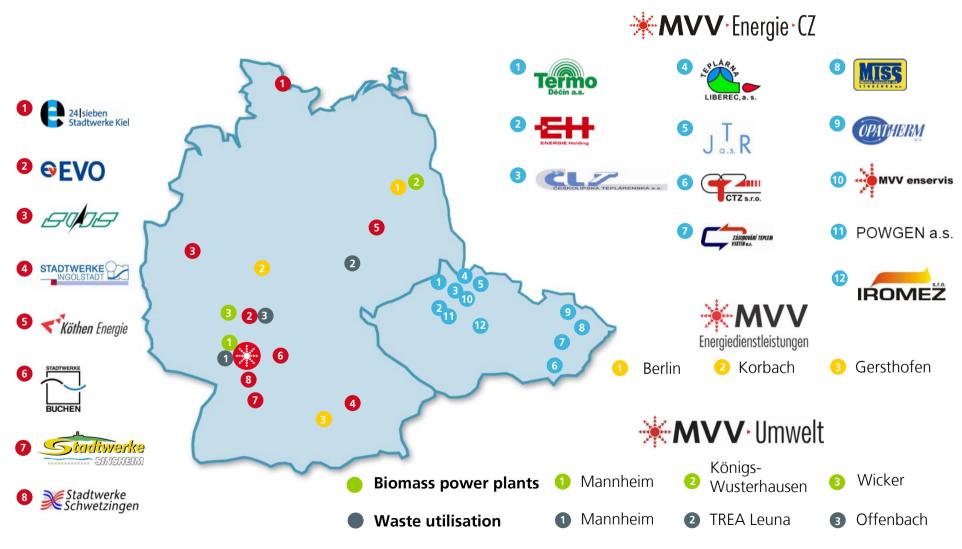

Trading (non-regulated)

Grids (regulated)

Sales (non-regulated)

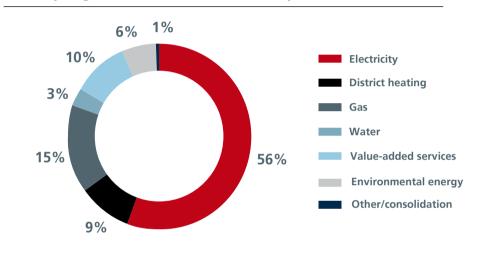

Municipal utility companies and major locations of the MVV Energie Group

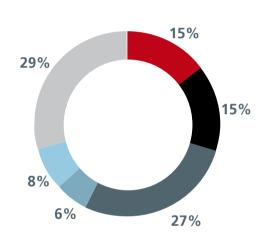

Sales and adjusted EBIT by segment – well-balanced business portfolio

Sales by segment in 2008/09 financial year

Adjusted EBIT in 2008/09 financial year

Key figures (2008/09 FY pursuant to IFRS)

Sales¹: Euro 3,161 million Adjusted EBIT : Euro 239 million Adjusted annual net surplus: Euro 185 million

Adjusted equity ratio: 33.9% Employees: 6,053

¹ excluding electricity and natural gas taxes

Key financial data for the First nine months of 2009/10 financial year

Key figures of the MVV Energie Group for the first nine months of 2009/10 financial year – Adjusted

Earnings performance in Euro million

	2009/10 (1.10-30.6.)	2008/09 (1.10-30.6.)	% change
Sales excluding electricity and energy tax	2,554	2,482	+3
Adjusted EBITDA ¹	357	357	0
Adjusted EBIT ¹	251	250	0
Adjusted EBT ¹	192	192	0
Adjusted net surplus for period ¹	129	129	0
Adjusted net surplus for period after minority interests ¹	120	117	+3
Adjusted earnings per share ¹ in Euro	1.83	1.78	+3
Free Cashflow ²	112	-110	-

¹ excluding non-operative IAS 39 valuation items/fair values of energy trading derivatives

² cash flow from operating activities less investments in intangible assets, property, plant and equipment and investment property

Sales by segment in the first nine months of 2009/10 financial year

Sales in Euro million

	2009/10 (1.10-30.6.)	2008/09 (1.10-30.6.)	% change

² correction in previous year

Key financial data for the 2008/09 financial year

We achieved all our targets in the 2008/09 financial year

► Sales target for 2008/09 FY was above Euro 2.8 billion.

With actual sales of Euro 3.2 billion this target has been achieved

► Adjusted EBIT target slightly lower than in 2007/08 FY (Euro 249 million). With actual adjusted EBIT of Euro 239 million this target has been achieved

Key figures of the MVV Energie Group for the 2008/09 financial year – Adjusted

Earnings performance in Euro million

	2008/09 (1.10-30.9.)	2007/08 (1.10-30.9.)	% change
Sales excluding electricity and energy tax	3,161	2,636	+20
Adjusted EBITDA ¹	385	398	-3
Adjusted EBIT ²	239	249	-4
Adjusted EBT ²	165	181	-9
Adjusted annual net surplus ²	12	123	-9
Adjusted annual net surplus after minority interests ²	98	110	-11
Adjusted earnings per share ^{2, 3} in Euro	1.48	1.69	-12
Free cash flow ⁴	20	54	63

¹ excluding non-operative IAS 39 valuation items in connection with energy trading derivatives

² excluding non-operative IAS 39 valuation items in connection with energy trading derivatives and excluding one-off charges for write-downs at energy-related services subgroup

³ increase in number of shares (weighted annual average) from 65.3 million to 65.9 million as a result of capital increase

⁴ cash flow from operating activities less investments in intangible assets, property, plant and equipment and investment property

Sales by segment in the 2008/09 financial year

Sales in Euro million

	2008/09 (1.10-30.9.)	2007/08 (1.10-30.9.)	% change
Electricity ¹	1,760	1,382	+27
District heating	294	303	-3
Gas ²	486	356	+37

Other/consolidation	-1	1	-200
	239	249	-4

¹ excluding non-operative IAS 39 valuation items in connection with energy trading derivatives and excluding one-off charges for write-downs at energy-related services subgroup

2008/09 financial year: EBIT adjusted for IAS 39 and one-off factors

in Euro million

	2008/09 (1.10-30.9.)	2007/08 (1.10-30.9.)	+/- change
EBIT	-23	337	-360
+ Net valuation item for financial derivatives	+229	-88	+317
+ Expenses for restructuring measure (one-off expenses and posting write-downs)	+33	-	+33
= Adjusted EBIT	239	249	-10

Factors relevant to adjusted EBIT performance in the 2008/09 financial year

Positive one-off factors

- Positive margin effects due to strong volume growth in gas business
- Cost savings due to optimised gas procurement for special contract customers
- ► Sale of gas cavern in Kiel and of two local gas grids in the Mannheim region

Negative one-off factors

- Lower revenues from electricity generation
- Price cuts and losses incurred due to lower volumes of consumption at industrial electricity customers in wake of economic crisis
- Sale/deconsolidation of Polish subgroup in previous year
- Volume and price reductions in waste business
- Downtime due to inspection measures and interruptions to operations at energy from waste plants in Mannheim and Leuna

Sales and adjusted EBIT performance by quarter

Euro million

	2008/09 (1.10-30.9.)	2007/08 (1.10-30.9.)	% change

of which wholesale ³	1,529	864	+77
of which retail/secondary distributors ³	9,322	8,302	+12
Water in m³ million	53.2	55.1	-3
Combustible waste delivered in tonnes 000s	1,599	1,550	+3

¹ total volume from all segments

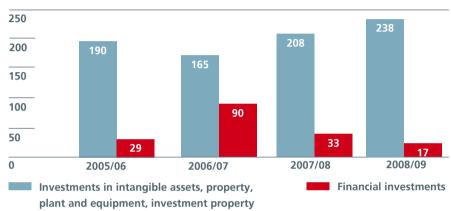

² recalculation of own-account trading in year under report and previous year

³ reallocation of secondary distributors in year under report and previous year

Investment and growth

Investments in Euro million

Investments in intangible assets in 2008/09 financial year

Existing business

- Optimising and preserving substance of supply facilities and distribution grids
- Extending the supply of district heating in Mannheim
- Renovation of supply tunnel under Kiel Firth

Environment

 Construction of Boiler 6 at Mannheim energy from waste plant

Energy-related services

- Construction of industrial power plants in Gersthofen and Korbach (refuse-derived fuels)
- Construction of biomass cogeneration plant in Mertingen
- Acquisition of new shareholdings in energyrelated services business

MVV Energie – Strategic positioning

Long-term structural transformation changes environment for the MVV Energie Group and provides framework for strategy

Mega-trends	Implication	Examples				
Structural change	Energy efficiency and climate protection	 Political intervention is changing the industry – CO₂ certificates, Renewable Energies Act 				
Stagnation / decline in demand	Crowding-out competition	 Most forecast institutes¹ expect to see stagnation – energy companies expect decline 				
Erosion in margins	Pressure on costs	 Marked increase over time in competitive pressure / pressure to consolidate in all stages of value chain (including grids) 				
New markets	Growth opportunities	 New business fields such as energy efficiency and renewable energies potentially offer new opportunities 				

¹ EWI, BMWI, Fraunhofer, BDEW – forecast with decline scenario

MVV 2020 – Two strategic basic approaches: optimisation and implementation

1 Optimisation of existing business

- Optimisation measures to lay foundation for strategic steps and counter charges on earnings
 - One-off expenses and posting write-downs aims to boost the efficiency of MVV Energiedienstleistungen GmbH for the future
 - Structure and process optimisation at MVV Energie AG and major utility shareholdings

2 Implementation of growth initiatives

▶ Enhancing portfolio of business activities

- Renewable energies (focus on wind onshore and biomass)
- Expansion of energy-related services after successful realignment
- Expansion of district heating
- Construction of the new Block 9 at GKM forms the basis for a secure long-term electricity and district heating supply
- Strengthening of industrial customer sales
- Further development of environmental energy business
- Municipal utilities/concessions

Targeted enhancement of energy-related services business; first lay foundations to successfully exploit attractive market climate

Opportunities

Market potential provides "tailwind"

- ► Energy-related services segment is one of the few business fields with substantial growth rates (3-5% p.a.)
- ► Less than 50% of market potential currently tapped

Market position achieved

► Number three in German energy-related services market

Challenges

Focus is required

- ► Achievable yields vary significantly between individual market segments
- ► Focus available resources (financial and personnel) on attractive market segments

Implement restructuring in near future

 Organisational and cost structures harbour potential for optimisation – the existing business must also meet return expectations

Entrepreneurial decision

Exploit market growth, focus energy-related services, generate positive value added contribution

Targeted further development of energy-related services business - foundations laid for successful restructuring

Key features of realignment ERS¹

- Increase operating efficiency
- ► Simplify organisational structures
- ► Reduce number of legal entities

Key areas of focus

- **▶** Contracting & Energy Efficiency Contracting services in the fields of energy supply, operations management and energy saving, reduce energy expenses by offering technical, commercial and all-round optimisation services
- ► Industrial Parks Services in the field of energy & utilities; services in the fields of occupational, environmental and health protection
- **▶** Consulting

Business areas not in focus

- **▶** Infrastructure Planning Especially land improvement and development projects and transport systems
- Power plants not based on cogeneration
- ► Individual consulting segments

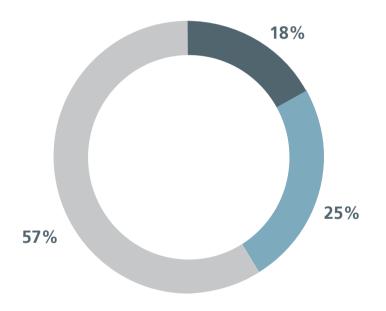

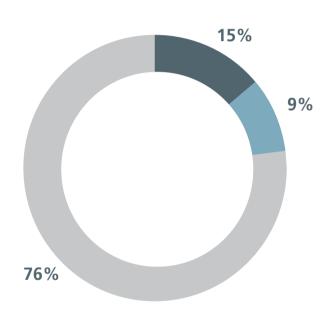

¹ energy-related services

High priority for renewable energies at MVV Energie Group

Electricity generation of the MVV Energie Group in Germany in the 2008/09 FY: 3.8 TWh

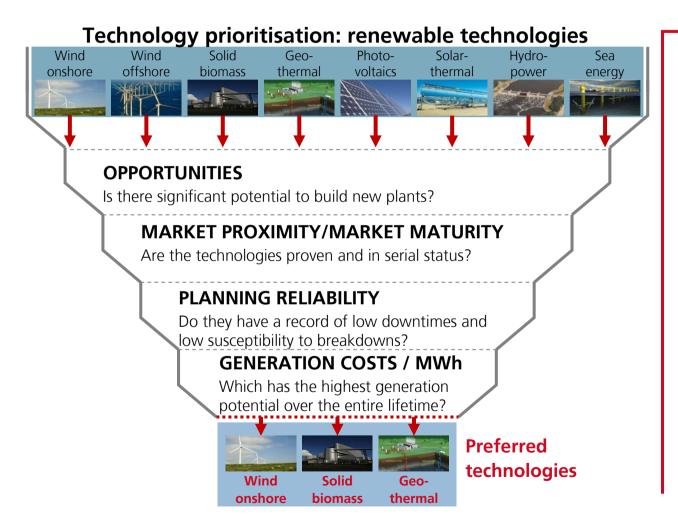

- Electricity from renewable energies including biomass CHP plants and biogenous share of waste
- **Electricity from cogeneration**
- Other electricity generation

Source: Federal Ministry of the Environment (BMU), AGE Energiebilanzen (preliminary) and own calculations

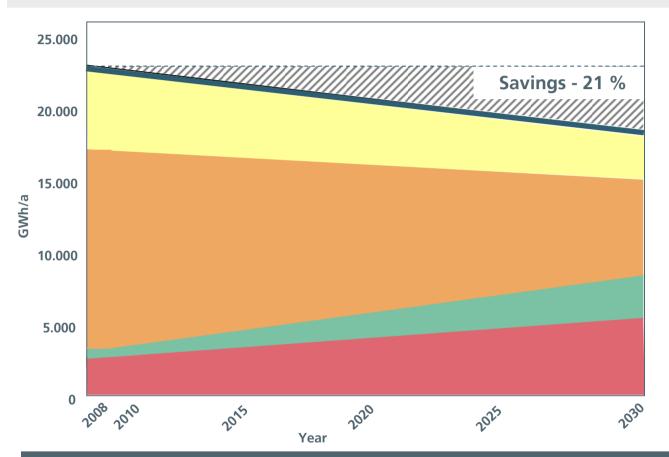

Expand renewable energies – technologies prioritised on basis of four key criteria

- ► Alternative renewable energies technologies assessed in accordance with four criteria within a "funnel model"
- On this basis, analysis of eight alternatives led to identification of three preferred technologies
 - Wind onshore
 - Solid biomass
 - Geothermal energy
- Monitor opportunities and implement when favourable opportunities arise

Results of district heating study in Rhine/Neckar metropolitan region

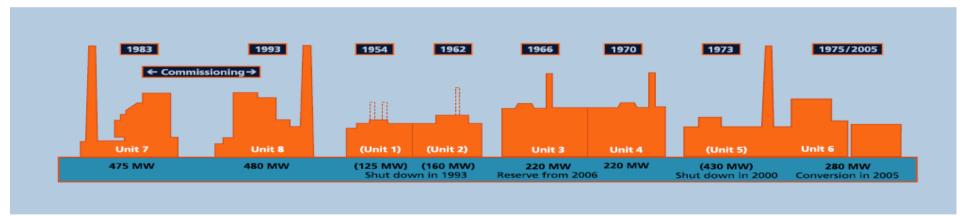

Energy source in %			
	2008	2030	
District heating	13.0	28.9	
Renewable	0.6	14.4	
Gas	63.4	46.2	
Oil	22.0	10.0	
Other	1.0	0.4	

Energy savings and increased energy efficiency will reduce consumption by 21%. Share of renewable energies and district heating set to rise to more than 43%. Share of fossil fuels due to fall from more than 85% to around 56%.

Foundation for further expansion of district heating

- Safeguarding secure, inexpensive, economical and environmentally-friendly supply of district heating in the long term (cogeneration)
- Climate-friendly CO₂ regime and increasing efficiency as well as saving resources
- Investment volume: Euro 1.2 billion, financing secured and organised by GKM itself
- Capacity: 911 MW electric power or 500 MW thermal energy

Grosskraftwerk Mannheim (GKM); MVV Energie AG share: 28%

With Block 9, we are laying the foundation for the expansion of cogeneration and district heating - an ecologically necessary step which also makes economic sense and is being promoted by the Federal Government.

Expansion of district heating

- ▶ Safeguarding secure, inexpensive, economical and environmentally-friendly supply of district heating in the long term (cogeneration)
- ► Climate-friendly CO₂ regime and increasing efficiency as well as saving resources
- ▶ Expansion (extension and concentration) of district heating in
 - Rhine/Neckar metropolitan region (Mannheim and Speyer)
 - Offenbach
 - Kiel
 - Ingolstadt

59% of households in Mannheim are connected to the district heating supply. Until 2030 the share of district heating is to be raised to 70%.

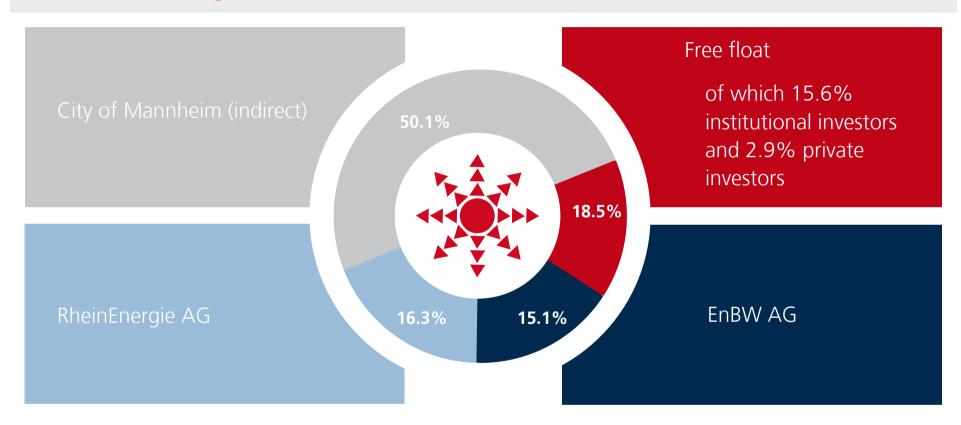

The share of MVV Energie

Current shareholder structure and key figures of MVV Energie AG

- No. of shares: 65.907 million
- ► Average daily turnover: 19,162 shares in 2008/09 FY
- Market capitalisation:

 Euro 2,044 million

 (Closing price on 12.8.2010:

 Euro 31.02)
- ► Free float: Euro 378 million

MVV Energie's share proved stable in a weak market

Share chart as performance comparison (including dividend payments in March 2009 and March 2010) with SDAX and DAXsector Utilities

High dividend distribution in past eight years

Dividend

	2001/02	2002/03	2003/04	2004/05	2005/06	2006/07	2007/08	2008/09
Dividend/Share (Euro)	0.75	0.75	0.75	0.75	0.80	0.80	0.90	0.90
Total dividend ¹ (Euro million)	38.0	38.0	38.0	41.8	44.6	52.7	59.3	59.3
Dividend yield ² (%)	5.0	4.9	5.2	3.9	3.4	2.7	2.7	2.9

¹ with dividend entitlement until FY 2003/04: 50.7 million shares; FY 2004/05: 55.7 million shares; FY 2005/06: 55.8 million shares; from FY 2006/07: 65.9 million shares

² dividend yield based on respective closing price in XETRA trading on 30 September

Advantages for our shareholders

- Stability due to diversified portfolio
- Solid balance sheet with matching maturities and high equity ratio
- ▶ High volume of **investments in future** in fields of renewable energies, energy-related services, district heating, power plant in Mannheim (GKM) and further expansion of nationwide sales of electricity and gas to industrial customers
- Solid dividend yields
- ► Listed in the Prime Standard (**SDAX**)
- Continuous improvement in IR communications

We are committed to shareholder value

Outlook

Outlook for 2009/10 financial year

► Sales target (excluding electricity and natural gas taxes) for 2009/10 financial year at around previous year's level (Euro 3.16 billion in 2008/09 financial year)

► Adjusted EBIT target at around previous year's level (Euro 239 million in 2008/09 financial year)

We cannot guarantee its reliability or completeness. The information herein shall not be deemed as a guarantee or any such instrument in any respect. MVV Energie AG reserves the right to amend, supplement or delete any information in this presentation at any time.

In addition to the figures prepared in our Annual Reports this presentation may contain further financial performance measures. These financial performance measures should be considered in addition to, but not as a substitute for, the information prepared in our Annual Reports. Other companies may define such financial performance measures in different ways.

Future-oriented statements

This presentation may contain statements on future developments ("future-oriented statements") that are based on currently available information and the plans, estimates and forecasts of the management of MVV Energie AG. Future-oriented statements include, but are not limited to projections of revenues, income, earnings per share, dividends, statements of plans or objectives for future operations. Such future-oriented statements are also indicated by words such as "anticipate", "may", "will", "should", "intend", "expect", "estimate" and similar expressions. These future-oriented statements are subject to risks and uncertainty and cannot be controlled or accurately predicted by MVV Energie AG. A multitude of factors such as changing business or market conditions, political and legal conditions, fluctuating currency exchange rates and interest rates, prices, stronger competition and sale risks, changes in the price and availability of raw materials, risks associated with energy trading (e.g. risks of loss in the case of unexpected, extreme market price fluctuations and credit risks) can cause actual events to differ significantly from any anticipated development.

Therefore it cannot be guaranteed nor can any liability be assumed otherwise that these future-oriented statements will prove complete, correct or precise or that expected and forecast results will actually occur in the future.

MVV Energie AG neither intends to nor assumes any obligation to update these future-oriented statements.
