Dr. Johannes Werhahn to be new Executive Board Sales Director at MVV Energie AG

MVV has appointed a new Sales Director to its Executive Board: Dr. Johannes Werhahn (44) will succeed Ralf Klöpfer as of 1 January 2026. Ralf Klöpfer announced in February 2025 that he would stand down from his Executive Board position at his own request at the end of the year.

Dr. Johannes Werhahn held various management positions at E.ON for nine years, including managing Strategic Procurement for all grid companies and heading the Energy Efficiency and Virtual Power Plant business fields in the International Wholesale Solutions business. From 2021, he worked as Managing Director at SPIE Energy Solutions GmbH, where he was responsible for the Energy Efficiency and Sustainability business for industrial customers and complex properties at SPIE Germany & Central Europe. Since 2023, he has been one of two Managing Directors at MVV Enamic GmbH, a subsidiary of MVV Energie AG.

The Supervisory Board Chair, Mannheim's Lord High Mayor Christian Specht, comments: "His expertise, his management qualities and his longstanding experience in the energy industry make Dr. Johannes Werhahn ideally suited to the role of Executive Board Sales Director. He combines knowledge of the market and of MVV with effective implementation skills, and that will further strengthen MVV."

"I look forward to my new role and to working on a basis of trust with the Supervisory Board, my colleagues on the Executive Board, staff participation bodies and all company employees. Our customers will remain at the centre of our activities. We will continue to focus our products and solutions consistently on their needs in future as well", remarks Dr. Werhahn.

MVV at a glance

With more than 6,600 employees and annual sales of around Euro 7.2 billion in the 2024 financial year, MVV is one of Germany's leading energy companies. Our activities focus on providing a reliable, economical and environmentally-friendly supply of energy to our industrial, commercial and private household customers. Here, we cover all stages of the energy value chain: from energy generation, energy trading and energy distribution to operating distribution grids through to our sales activities and environmental energy and energy-related service businesses. We are also investing in our future grid capability, modernising our generation plants and innovative green technologies.

We are pioneers of the energy transition. With our Mannheim Model, we have committed to a strategic course that will make us #climatepositive by 2035 – as one of the first energy companies in Germany. We are consistently promoting the heat transition, the electricity transition and the associated expansion in renewable generation methods, as well as green solutions for our customers. As certified by the international “Science Based Targets initiative” (SBTi), our climate targets and initiatives make us the first German energy company to be net zero compatible and a global leader in climate protection. According to prestigious rating agencies such as ISS ESG and Ecovadis, we are also one of the world's best energy companies when it comes to sustainability. In all our activities, we can count on the mature competence and expertise of our employees. They stand to benefit from secure and attractive jobs in future as well.

MVV is a company in the Rhine-Neckar Metropolitan Region. The MVV Group has operations worldwide.
