15th April, 2014

Gold Award for the Devonport Energy from Waste CHP Facility Construction Site

The Devonport Energy from Waste Facility construction site has been presented with a Gold Award at this year's Considerate Constructors Scheme National Site Awards, putting the site in the top one percent of 8,500 eligible projects nationwide. The award was given to MVV Umwelt O&M GmbH as the principal contractor and subsidiary of German company MVV Umwelt.

John Wade, construction director for MVV Umwelt O&M, says: "This award is a credit to the whole site construction team and all those people who have worked here over the last two years. It has been a tremendous team effort, and being recognised as an outstanding site is a reward for this hard work."

The construction site at North Yard, Devonport, has been a member of the Considerate Constructors Scheme from the very early stages. The reports of the site visits by the CCS monitor can be found on the project website. In 2012 and 2013, the site received certificates for Performance beyond Compliance from the Considerate Constructors Scheme.

The Considerate Constructors Scheme is the national initiative set up by the construction industry to improve its image. The Scheme is concerned with any area of construction activity that may have a direct or indirect impact on the image of the industry as a whole.

Note to Editors:

MVV Environment Devonport Limited is an English registered company with its registered office in Plymouth. It is the subsidiary company of MVV Umwelt. Both companies are members of German utility company MVV Energie, whose headquarters are in Mannheim. MVV Umwelt provides flexible solutions for waste disposal, producing environmentally sustainable energy. In Germany, MVV Umwelt operates six Energy from Waste and biomass plants, managing 1.6 million tonnes of waste a year. With over 45 years' experience, MVV Umwelt is in the top three companies in Germany in its field .
