

10th March 2021

Application for the MEB Comic Strip Competition in partnership with Angus Council, DC Thomson and Developing Young Workforce Dundee & Angus is now open.

Working in partnership with Angus Council, DC Thomson and Developing Young Workforce Dundee & Angus, MEB has rolled out a Comic Book Strip competition for Angus Council Primary Schools pupils attending P5 to P7.

All P5 to P7 pupils are encouraged to take up the challenge to create their own comic strip on either Safety, Health or Health and Safety. The key focus is that children use their imagination however, entries will be judged on the merits of skills used in relation to: focussing, creativity, curiosity & communication.

This project supports in developing the four educational capacities of Successful Learners, Confident Individuals, Responsible Citizens and Effective Contributors and may support with some of the “I can statements”.

For more information on the criteria and deadlines, please contact your P5 to P7 teachers.

An Awards Ceremony will be held on 17th June 2021 where the successful students will be welcomed to the Facility and given the opportunity to visit the site and learn about sustainable waste management.

Press queries may be directed to Paul Carey, Managing Director, on 07768 842 715

Note to Editors

About MVV

With a work force of almost 6000 employees and an annual turnover of around € 4 billion, MVV's core business comprises the distribution of energy, natural gas and water in Mannheim and other cities, the generation of Energy from Waste (EfW) and other energy projects with a focus on renewables such as onshore wind power and energy efficiency.

MVV Umwelt, a subsidiary company of MVV, has over 50 years' experience in building and operating waste management facilities in Germany, and is one of the top three companies in Germany in its field. “Umwelt” is the German word for environment, so it operates as MVV Environment in the United Kingdom. In Germany, MVV Umwelt operates five EfW (taking residual household waste) and Biomass (taking waste wood) facilities, treating 1.6 million tonnes of waste and biomass a year.

MVV entered the UK market in October 2008, bidding primarily for public sector waste contracts across the country. Now established as a responsible and growing group of companies in the UK, MVV operates three EfW and Biomass facilities treating over 500,000 tonnes of household residual waste and biomass a year. MVV is currently constructing a new energy from waste combined heat and power facility at Baldovie, Dundee.
