

23rd August 2021

Application for the £11,500 MVV Challenge Fund is now open.

Applications are now open for MVV's Challenge Fund which will provide upto £11,500 to schools in Dundee City and Angus Councils for projects in the areas of engineering, construction and waste reduction.

MVV welcomes applications for projects, activities and programmes which will benefit the school community. The full Challenge Fund criteria can be downloaded from the Baldovie page on the MVV website (www.mvvuk.co.uk) or requested from our Community Liaison Manager, Mimi Mwasame, 07966 216 041 / mimi.mwasame@mvvuk.co.uk.

Applications are now open, and the closing date is 22nd December 2021.

An Awards Ceremony will be held on 27th January 2022 where the successful schools will be welcomed to the Facility and given the opportunity to visit the site and learn about sustainable waste management.

Press queries may be directed to Paul Carey, Managing Director, on 07768 842 715

Note to Editors

About MVV

With a work force of almost 6000 employees and an annual turnover of around € 4 billion, MVV's core business comprises the distribution of energy, natural gas and water in Mannheim and other cities, the generation of Energy from Waste (EfW) and other energy projects with a focus on renewables such as onshore wind power and energy efficiency.

MVV Umwelt, a subsidiary company of MVV, has over 50 years' experience in building and operating waste management facilities in Germany, and is one of the top three companies in Germany in its field. "Umwelt" is the German word for environment, so it operates as MVV Environment in the United Kingdom. In Germany, MVV Umwelt operates five EfW (taking residual household waste) and Biomass (taking waste wood) facilities, treating 1.6 million tonnes of waste and biomass a year.

MVV entered the UK market in October 2008, bidding primarily for public sector waste contracts across the country. Now established as a responsible and growing group of companies in the UK, MVV operates three EfW and Biomass facilities treating over 500,000 tonnes of household residual waste and biomass a year. MVV is currently constructing a new energy from waste combined heat and power facility at Baldovie, Dundee.
