

▶ **MVV provides additional information on plans for EfW plant**

PRESS RELEASE

MVV Environment Devonport Ltd has now provided further information to Plymouth City Council's Planning Department on its application for development of an Energy from Waste plant with Combined Heat and Power at North Yard, Devonport.

The Council had issued a Regulation 19 Notice to MVV, seeking clarification on a number of issues in the planning application which MVV submitted in May. This request followed issues raised by members of the public, as well as initial comments and replies from the statutory consultees.

MVV has prepared an extensive and comprehensive response to the questions raised. There will now be a further period of 21 days for people to comment.

Paul Carey, Managing Director of MVV Environment Devonport Ltd, said:

"We welcome the opportunity to further clarify our proposal to Plymouth City Council and we are confident that the information provided will be helpful in explaining more clearly the merits of our scheme."

The supplementary information is now publicly available at the company's homepage at www.mvvuk.co.uk, where it can be downloaded free of charge, along with the planning application, and also on Plymouth City Council's website (www.plymouth.gov.uk).

Electronic copies of the additional information and the original planning application and Environmental Statement will also be available in the Civic Centre and in public libraries in Plymouth. Hard copies will also be available to be viewed in public libraries in Plymouth, the Civic Centre and MVV's Plymouth office.

MVV's Plymouth office is at Unit 10, Scott Business Park, Beacon Park Road, Plymouth PL2 2PQ. The office is open on Monday from 4.30pm – 7.30pm and on Tuesday, Wednesday and Thursday, from 10am to 3pm (tel: 01752 565412).

PRESS RELEASE

Notes to editors:

MVV Environment Devonport Limited is an English registered company with its registered office in Plymouth. It is the subsidiary company of MVV Umwelt. Both companies are members of German utility company MVV Energie, whose headquarters are in Mannheim. MVV Umwelt provides flexible solutions for waste disposal, producing environmentally sustainable energy. In Germany, MVV Umwelt operates six Energy from Waste and biomass plants, managing 1.6 million tonnes of waste a year. With over 45 years' experience, MVV Umwelt is in the top three companies in Germany in its field.
