

▶ **MVV publishes more details of proposals for Energy from Waste plant**

Following a meeting with councillors from the member authorities of the South West Devon Waste Partnership, MVV Environment Devonport Ltd has issued further plans and drawings, giving more details of its proposals for an Energy from Waste plant at North Yard, HM Naval Base Devonport.

Paul Carey, Managing Director of MVV, said:

‘Because of the high level of interest in the proposals we are releasing further drawings now before the public exhibitions. We hope that the additional elevations and landscape drawing will give people a better idea of what the plant could look like, and the photomontages will show how it sits in the site.’

The site will include a visitors’ centre which will be used by the Partnership and the local community for various purposes, including educational activities. Once the Local Liaison Committee has been set up, MVV would be asking members for suggestions for its further use. Mr Carey said that Blackies Wood, which also formed part of the site and was currently unused, would be tidied up and could be used by local people, possibly as a nature conservation area or for recreational purposes.

Mr Carey added that he hoped people would take the opportunity to study the proposals in more detail at the series of roadshows that are being held jointly with South West Devon Waste Partnership, and to register their interest in joining the Local Liaison Committee.

The exhibitions will be held at the following venues:

8th February 2011	2:30pm - 6:30pm, Torbay Town Hall, Castle Circus, Torquay
9th February 2011	4:30pm - 7:30pm, Weston Mill Community Primary School, Ferndale Road, Plymouth
10th February 2011	2:30pm - 6:30pm, Tamar View Community Complex, Miers Close, St Budeaux, Plymouth
11th February 2011	4:30pm - 7:30pm, Drake Primary School, Johnstone Terrace Ope, Keyham, Plymouth

Plymouth, 21st January 2011

Notes to editors:

MVV Environment Devonport Limited is an English registered company with its registered office in Plymouth. It is the subsidiary company of MVV Umwelt and will be the contractor to SWDWP. Both companies are members of German utility company MVV Energie, whose headquarters are in Mannheim. MVV Umwelt provides flexible solutions for waste disposal, producing environmentally sustainable energy. In Germany, MVV Umwelt operates five Energy from Waste plants, managing 1.6 million tonnes of waste a year. With over 45 years' experience, MVV Umwelt is in the top three companies in Germany in its field.
