MVV ENVIRONMENT BALDOVIE

BALDOVIE NEWS

DEAR NEIGHBOUR

As we embark upon a new year, MVV Environment Baldovie wishes you and your loved ones a wonderful 2023. We would like to take this opportunity to share some news from the last year with you, as well as introduce our new Community Liaison manager, Sarah Cartmill.

OPEN DAY 2023

Our open day will take place on Friday 7th July 2023, if you would like to attend please email Sarah: sarah.cartmill@mvvuk.co.uk for more information.

LINE 3 OPENING CEREMONY

The team celebrated the official opening of the new Line 3 in Baldovie, a state of the art energy from waste combined heat and power facility. After a four-year build, due to weather and COVID-19 pandemic delays, the team were elated when the facility successfully completed all commissioning tests at the start of 2022. The curtain fell to reveal the modern artwork which complements other pieces in the city of Dundee. The success of the day is testament to the dedication and hard work of the team, as well as demonstrating the true partnerships with our customers, partners, and contractors. The new energy from waste facility will process approximately 110,000 tonnes of waste per year, providing an environmentally sustainable waste treatment solution for Dundee City Council and Angus Council by keeping residual (non-recyclable) waste out of landfill.

**COMMUNITY
LIAISON MANAGER
SARAH CARTMILL**

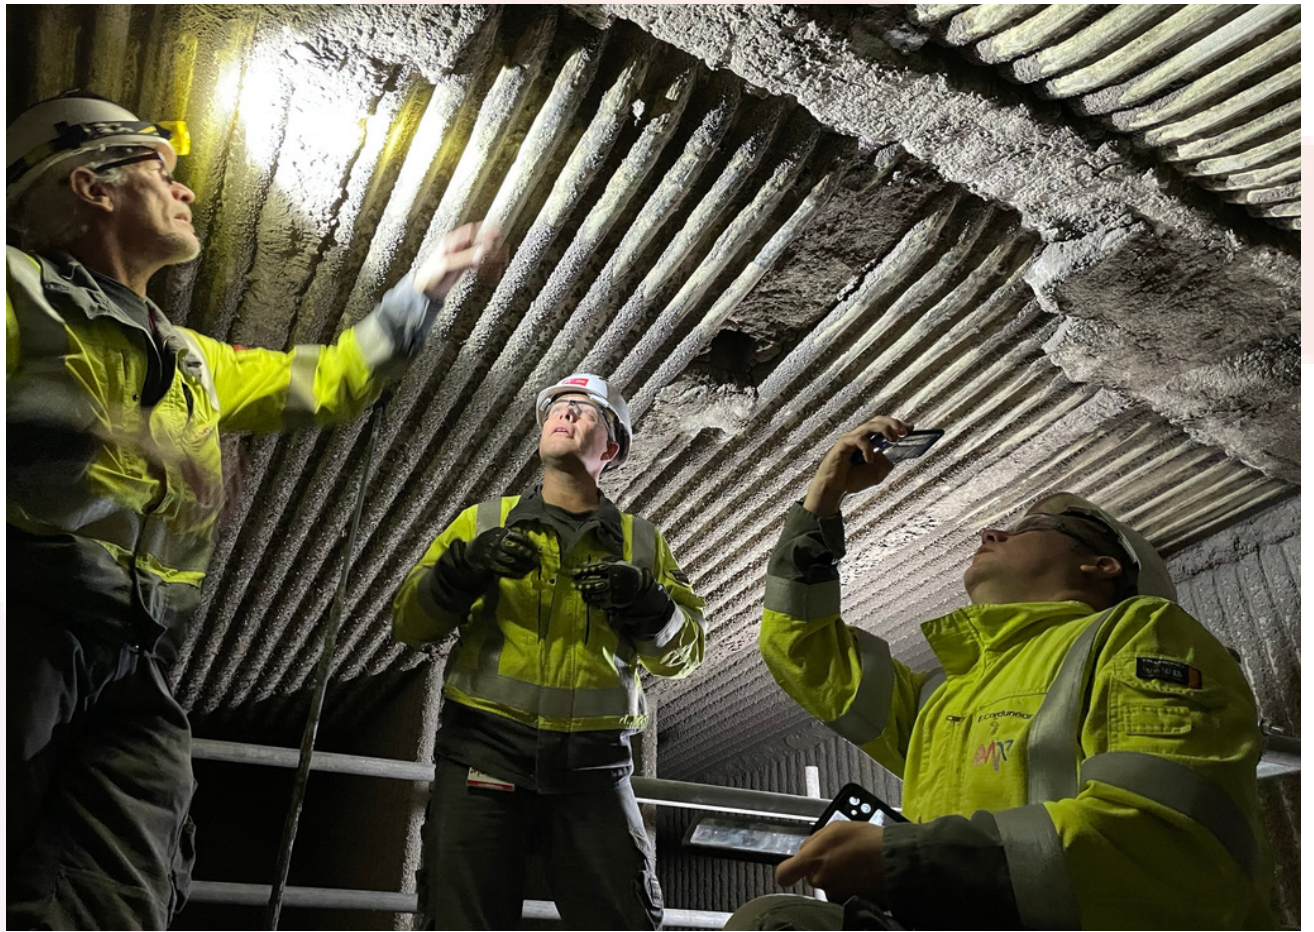

GOOD NEIGHBOURS GROUP 2023

Good Neighbours Group will be meeting throughout the year. This will give you the opportunity to join us at the facility or online. If you would like to come along, please email Sarah for more information.

OUTAGE LINES 1 & 2

We recently completed a tiring yet successful couple of weeks for the team working on Lines 1&2. The existing facility built more than 20 years ago. Annual maintenance ensures we continue to meet and exceed all environmental standards. The team worked hard to deliver against ambitious targets. The boiler restart was smooth with only a few minor issues, which is a credit to the team given the amount of work which was undertaken.

MVV UK'S FIRST FEMALE ENGINEER

We welcomed our first female engineering apprentice to the Baldovie team. Lindsey Dunbar, a former student at Craigie High School, has joined us as a Multi-Skilled Engineering Apprentice. MVV is committed to supporting apprenticeship opportunities in areas related to our industry; we have built a good working relationship with the local college as we are keen to upskill young people and train the next generation of engineers.

OUR COMMUNITY

SPONSORSHIP

In our autumn round of sponsorship, we supported Big Noise in Douglas, a music and social change programme, The Toolbox, a sustainable idea dreamt up by Wellbeing Works, and Scrap Antics drop-in art sessions, where people can find a warm meal. The Baldovie site team also donated to Mission Christmas and The Sunshine Box, as well as sponsoring The Christmas Bauble Trail. As a company that employs a number of ex-servicemen and women, the team were happy to support the Festival of Remembrance. Finally, we launched the Comic Strip Competition in Schools, with great prizes to be won - look out for our winners in The Telegraph, on our social media and website.

TOURS

We have had the opportunity to talk about our energy from waste solution to school, college, and university groups, as well as our industry peers and partners. We have been joined by our Dundee City and Angus Council partners throughout the year. Visits to our plant give us the opportunity to educate and inspire people to Reduce, Reuse and Recycle. Receiving conforming waste is vital for the safety of our team and our facility. If you work in the community or education, you can get in touch to discuss a tour: sarah.cartmill@mvvuk.co.uk.

ENCOURAGING YOUNG MINDS IN STEM AT STEMEXPO 2022

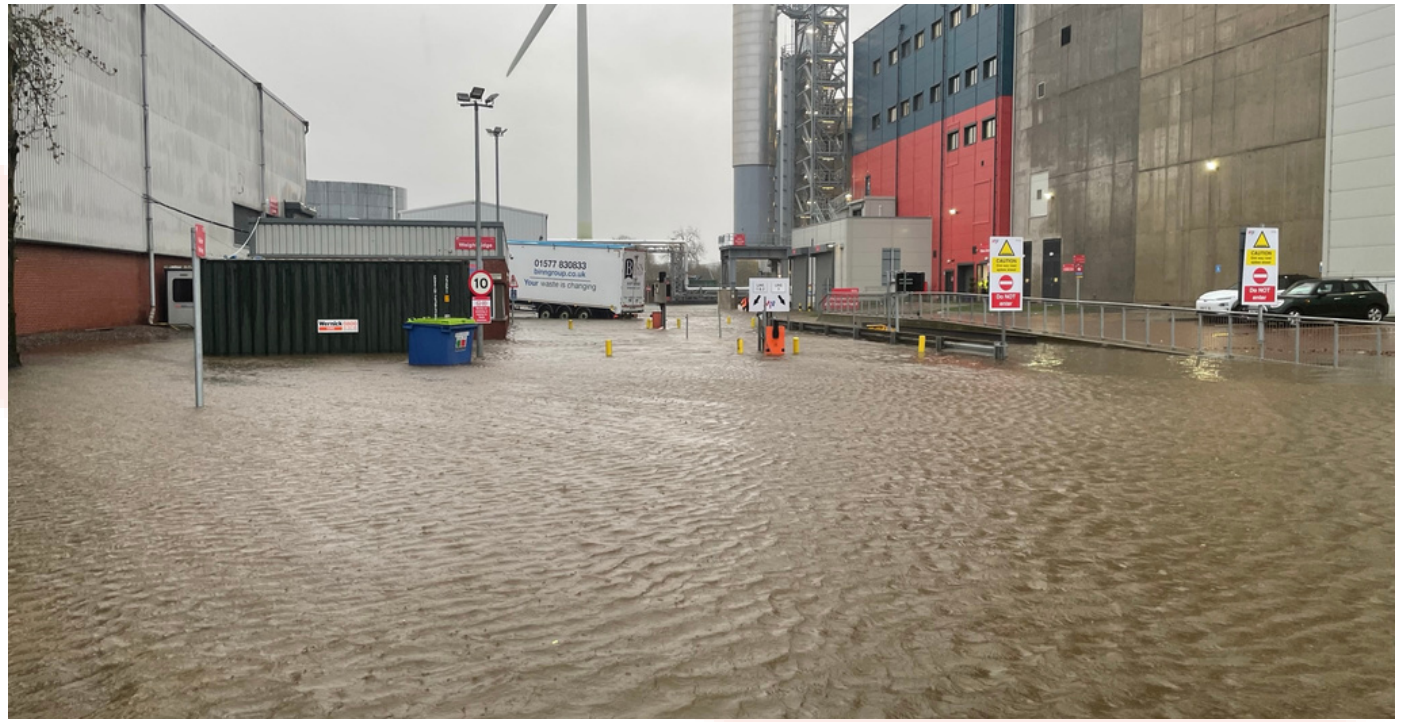

The team joined forces to bring inspiring activities to secondary school children from across Dundee and Angus, who will be choosing their subjects this year. We were there to show that Science, Technology, Engineering, and Maths

are thought provoking, fun and useful for a future in a variety of careers. The children were involved in making lemon batteries and engineering their balloons for a balloon race, as well as learning about energy with a fire piston and Line 3A miniature boiler demonstration. We will be back next year!

OUR ENVIRONMENT

FLOODS

Team Baldovie pulled together to manage the biggest flood at the facility to date. Everyone worked very hard to protect the facility and put in place a contingency plan to remain operational. We all have a shared ambition to manage floods in our area and, as we are very close to the Dighty, we may have to start exploring future flood proofing solutions.

YOUR WASTE REDUCE, REUSE, RECYCLE

It is more important than ever to try to reduce the amount of waste we produce. Replacing single use items, such as plastic bottles with a reusable bottle, will stop the item from being made in the first place. As we try to reduce our reliance on fossil fuels, reusing an item with longevity will create a shift in the demand for single use items. Recycling at home conserves energy, reduces air and water pollution, reduces greenhouse gases, and conserves natural resources. You will be supporting the circular economy and giving back to the city we all live in. Here at Baldovie we receive everything that goes into your purple (Angus residents) or black (Dundee residents) bin. Safety of drivers and our team is our main priority. It poses a real and significant danger to our staff when we receive gas canisters, batteries and vapes in your bins. Please recycle these responsibly and help to keep our team safe.

We inspire
with energy.

MVV Environment Baldovie

welcomes local businesses who are
looking for information and mentoring
on Health and Safety.

Come along to our 9am or 1pm session
on Wednesday 8th February 2023

At this event you will learn from our Health
and Safety experts about best practice. Find
out what you can put in place to keep
your business, staff and customers
safe and compliant.

To sign up for this event please contact:
